Confined Space Entry Procedure Inspection Checklist

Interactive checklist for inspecting confined space entry procedures. Tick, comment, and export as PDF/Excel with QR code verification.

Project:	
Date:	
Filled by:	

Pre-Entry Checklist

1	Verify confined space classification and the need for entry permits.
2	Ensure all personnel have completed required safety training.
3	Review emergency and rescue procedures with team members.

Safety Equipment Check

4	Inspect personal protective equipment (PPE) for damage and wear.
5	Calibrate and test gas detectors for functionality.
6	Verify communication devices are operational and have sufficient battery life.

Entry Procedures

7	Conduct a pre-entry atmospheric test to identify potential hazards.
8	Ensure continuous atmospheric monitoring is in place during entry.
9	Confirm that entry and exit points are clear and accessible.

Post-Entry Review

10	Conduct a debrief with all team members to discuss the entry.
11	Log any incidents or near misses during the entry for future reference.

Introduction	How to use this checklist
Confined space entry procedures are critical for ensuring safety and compliance when workers enter enclosed or partially enclosed areas that are not designed for continuous occupancy. These spaces may pose unique hazards, such as toxic atmospheres, engulfment risks, or limited entry and exit. This checklist covers essential inspection points to ensure all safety protocols are in place and followed rigorously. By adhering to these guidelines, risks are minimized, and the well-being of personnel is prioritized. Users can engage interactively by ticking off items, adding comments, and exporting completed reports with a QR code for verification.	1. Click the "Use this checklist" or "Start Interactive Checklist" button to launch interactive mode. 2. Tick each item online as you complete it. 3. Add comments on individual items or the entire checklist. 4. Click Share or Download to download your completed checklist as PDF or Excel.
