

Decorative Metalwork Inspection Checklist

Interactive checklist for inspecting decorative metalwork, ensuring alignment and finish. Export as PDF/Excel.

Project:
Date:
Filled by:

Alignment Check	
1	Verify horizontal and vertical alignment of all handrails using a spirit level.
2	Ensure screens are aligned properly with surrounding structures using laser guides.
3	Cross-reference alignment with design blueprints to ensure compliance.

Finish Assessment	
4	Inspect handrails for uniform coating and absence of blemishes.
5	Check screens for consistent texture and finish quality.
6	Look for signs of rust or corrosion on all metal surfaces.

Safety and Stability	
7	Confirm that all handrails are securely fastened and stable.
8	Check screens for secure attachment and lack of movement.

Documentation	
9	Photograph any areas of concern for further assessment.
10	Record alignment and finish findings in the inspection log.

Introduction	How to use this checklist
Inspecting decorative metalwork, such as handrails and screens, is crucial for ensuring both aesthetic appeal and structural integrity. This inspection focuses on alignment and finish, ensuring that metal elements meet design specifications and safety standards. By thoroughly assessing each component, inspectors can identify potential issues that may affect durability or appearance. Utilizing this checklist enhances quality assurance, helping you deliver flawless results. Users can interactively tick items, leave feedback, and export their findings, ensuring a comprehensive inspection report with QR code verification for authenticity.	1. Gather necessary tools such as spirit levels, laser guides, finish gauges, and safety gear. 2. Click the 'Use this checklist' button to start the interactive mode. 3. Tick each item as you complete it to ensure no aspect is overlooked. 4. Add comments for any discrepancies or additional notes. 5. Download your completed checklist as PDF or Excel for records or sharing.
