### Fixture Installation

| | |
|---|---|
| 1 | Check that all faucets are securely mounted and operate smoothly without leaks. |
| 2 | Ensure that sinks are properly sealed and aligned with countertops. |
| 3 | Verify that toilets are securely anchored and flush properly without leaks. |
| 4 | Inspect showers and bathtubs for proper installation and drainage. |

### Water Supply Connections

| | |
|---|---|
| 5 | Check that all water supply lines are correctly connected and free from leaks. |
| 6 | Ensure shut-off valves operate smoothly and are leak-free. |
| 7 | Verify that water pressure is within acceptable limits at all fixtures. |

### Drainage Connections

| | |
|---|---|
| 8 | Inspect all drains for proper connection and absence of leaks. |
| 9 | Ensure that traps are correctly installed and accessible for maintenance. |
| 10 | Check that vent pipes are correctly installed to prevent siphoning. |

### Final Verification

| | |
|---|---|
| 11 | Test all fixtures for adequate operation, including hot and cold water. |
| 12 | Document any defects or irregularities found during the inspection. |
| 13 | Ensure all inspection results are signed off by authorized personnel. |

| Introduction | How to use this checklist |
|---|---|
| Inspecting plumbing fixtures and final connections is a critical phase in ensuring the integrity and functionality of plumbing systems. This process involves examining all installed fixtures such as faucets, sinks, toilets, and showers, as well as their connections to water supply and drainage systems. The goal is to ensure compliance with plumbing standards, detect any leaks, and confirm that all components are securely and correctly installed. This checklist offers a systematic approach to the inspection, allowing users to efficiently verify each element. Interactive features enable users to tick off items, add comments, and export the checklist as a PDF or Excel file, complete with a QR code for authentication, ensuring a thorough and documented inspection process. | 1. Preparation: Gather necessary tools such as a flashlight, wrench, and plumbing tape. Ensure the inspection area is clean and accessible. 2. Using the Interactive Checklist: Click the 'Use this checklist' button to start. Tick each item as you complete it, add comments, and download the completed checklist. 3. Sign-Off: Review all completed items, ensuring all defects are noted. Share the final report with stakeholders and archive using the QR code for authentication. |
