Specialized Flooring Inspection Checklist

Interactive checklist for inspecting specialized flooring like epoxy and industrial coatings. Tick, comment, and export as PDF/Excel with QR code.

Project:

Date:

Filled by:

Surface Integrity

1	Inspect the surface for any visible cracks or chips.
2	Check for any discoloration or staining.

Coating Adhesion

3	Perform an adhesion test in multiple areas to ensure coating is secure.
4	Examine edges and corners for signs of peeling or detachment.

Moisture Levels

5	Use a moisture meter to check for excess moisture underneath the flooring.
6	Inspect for any mold or mildew in areas prone to moisture.

Safety Compliance

7	Verify that the flooring meets all relevant safety standards and regulations.
8	Ensure anti-slip treatments are effective, especially in high-traffic areas.

General Maintenance

9	Check that routine maintenance schedules are being followed.
10	Review cleaning procedures to ensure they do not damage the coating.

Introduction	How to use this checklist
Specialized flooring inspection encompasses the evaluation of epoxy and industrial coatings used in various settings such as warehouses, factories, and commercial spaces. These types of flooring are designed to withstand heavy traffic, chemical spills, and other industrial wear and tear. This checklist is tailored to ensure that these floors maintain their durability, safety, and aesthetic appeal. It includes steps to check for surface integrity, coating adhesion, and compliance with industry standards. Users can interact with this checklist online, marking tasks as complete, leaving comments, and exporting the results as a PDF or Excel document secured by a unique QR code for authenticity.	<ol style="list-style-type: none">1. Click the 'Start Interactive Checklist' button to launch interactive mode.2. Tick each item online as you complete it.3. Add comments on individual items or the entire checklist.4. Click 'Share' or 'Download' to download your completed checklist as PDF or Excel.
